	$5.000	268	75	267	19	1	56	13	$17.709.4442

The issue of gold dollar pieces from the Phila. Mint only, is given, because the pieces above handled, with the exception of five from the New Orleans Branch Mint, are believed to have all been issued from the Phila. Mint. The above statement does not show the entire loss from abrasion, as it was made before the coin was cleaned. It will be observed from a statement accompanying this, [I marked (*)] that there is a loss from dirt of about 18/100ths of an ounce, on every 1000 ozs. This added to the above would show the accurate loss from abrasion - The result would scarcely alter the above figures.

R E Rogers
of the Assistant Commission.
